REASONS FOR ALLOWANCE

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 12, 2005 has been entered.

1. The following is an examiner's statement of reasons for allowance: The amending of claim to "negative planographic printing plate" along with applicant's explanation of negative planographic printing plate as one which the negative acting layer results in a negative image being formed such that the exposed area is where the ink resides upon development. The examiner carefully considered all parts of both the inventive "negative planographic printing plate" and the positive plate of Hauck. While the layers appear to very close as generically defined, the examiner cannot read into the plates of Hauck, any plate which would yield the negative plate precursor as claimed by applicants. While both make use of negative layers which are either crosslinkable or polymerizable, the nature of the relationship between the top layer and the negative acting layer in Hauck yields a positive plate while the system of the inventors yields a negative plate. Since the plate actually made by Hauck and applicants are different in many small ways the examiner cannot state with any certainty that the plates of Hauck would ever yield the negative plates of applicants. Thus, because of the wording "negative planographic printing plate" along with applicants' explanation of such terminology which is supported by the original specification, the instant claims are found allowable over the prior art.
